

Amendments to the Claims

This listing of the claims replaces all prior versions and listing of the claims in the present application.

Listing of Claims

1-22. (canceled)

23. (currently amended) A device for supporting a panel on a base in a substantially vertical position, perpendicular to thrust of a fluid that moves relative to the panel and to the base, the panel having two opposite display faces and lateral ends, the device comprising:

at least two substantially triangularly shaped support arms, at least one of said at least two support arms being located on each of opposite display faces ~~sides~~ of the panel;

at least two elastic means,

wherein each of said at least two substantially triangularly shaped support arms has ~~having~~ one side ~~side~~ directly linked to a respective one of the display faces of the panel and an apex opposite the one side linked to a first end of a respective one of said at least two elastic means; and

at least two removable fastening means repositionable on the base, wherein an end of each of said at least two elastic means opposite said first end is attached to a respective one of said at least two removable fastening means,

wherein said at least two elastic means are in a plane different from a plane of the panel and are arranged so that when the fluid exerts thrust on the panel, at least one of said at least two elastic means undergoes a compression and another of ~~at least one~~ said at least two elastic means undergoes an extension in order to urge the panel to return to ~~maintain~~ an initial position of the panel.

24. (previously presented) The device of claim 23, further comprising at least three said elastic means.

25. (previously presented) The device of claim 23, wherein said at least two elastic means are springs.

26. (previously presented) The device of claim 23, wherein said at least two removable fastening means are magnets.

27. (previously presented) The device of claim 23, wherein said at least two removable fastening means are suction cups.

28. (canceled)

29. (currently amended) The device of claim ~~[[28]]~~23, wherein said at least two substantially triangularly shaped support arms are part of a substantially triangularly shaped support plate constituted by said at least two support arms coupled together by said one side that is arranged to be attached to the panel.

30. (previously presented) The device of claim 23, further comprising the panel, wherein said panel is one of a two-sided display and a cylindrical display.

31-33. (canceled)

34. (previously presented) The device of claim 23, further comprising the base, wherein a location of said base is movable.
